ONCE YOU CARRY
YOUR OWN WATER,
YOU WILL LEARN
THE VALUE OF
EVERY DROP

Introduction

Founded in 2008 as Green Dot Corporation & Later on it has been turned into Green Dot Limited in 2011 by registering with the Joint Stock Companies of Bangladesh. Green Dot Limited is an extra-oriented leading integrated Consulting and Engineering Company, that mainly specializes in the water sector.

Water is a fundamental part of our lives. It could be use for drinking, bathing, or using in any kind of industry. We can't think of a single moment of our lives without water. From the very beginning, Green Dot Ltd. has grown to become a world leader in the design, drawing, supervision and supply of water / wastewater treatment and water desalination systems. Over a thousand installations to Green Dot Ltd.'s credit hav earned it a reputation for professional excellence through a proven record of strong and reliable performance.

We are committed to providing a first class service to complement our quality products & to offering clients strong local support along with the latest technologies in the field of water & wastewater treatment. Green Dot Limited's expertise in this field spreads over our country, where millions of people benefit daily from the services that our company provides. We comprise highly motivated executives, managers, engineers and support staffs, whose industry experience run collectively and successfully. The extensive in-the-field experiences of Green Dot Ltd. Staffs are continuously enhanced by company training and development programs which assure the constant expansion and updating of knowledge.

Our Concern

A leading trading company in Bangladesh, deals with water purifiers & accessories for environmental engineering equipments. work as a contractor for the installation, supply, & erection-commissioning of water treatment & pump, motors, blowers, ETP, STP, Swimming pools & other electro mechanical products & environmental projects.

Work as a contractor on Construction, Installation, Erection-commissioning of Desalination and Environmental Projects.

ABM Engineering Limited is related to all types of production of water treatment items like housing, pp, filter, housing opener, clamp, water tank, pneumatic tube, HDPE pipe, ect.

ABM Infrastructure Limited is related to the real-estate business.

Water Birds Limited is related to all types of production of water treatment items and works as a contractor for construction, installation, erection-commissioning of Desalination and Environmental Projects.

Aqua Dynamics Limited supplies Pipe, Fittings, Valve & other accessories for industrial projects.

N S BD Corporation is related to Tender related activities.

SEWAGE TREATMENT PLANT (STP) In Details

Why STP?

Sewage treatment plants play an important role for mankind. The main function of these plants is to make the water from the sewage clean that comes from the home, commercial, & industrial sectors. The treatment of sewage water has become the need of the hour as it stops spreading the diseases and illnesses caused by sewage water. It helps society by making the water clear as well as the environment clean.

FOR MUNICIPAL & COMMERCIAL

The GDL ECO™ treatment plant is installed in one tank, which consists of two compartments: a sludge storage tank & an SBR/MBR reactor. It works on the principle of venturi. It is suitable for the treatment of municipal wastewater from settlements, catering and commercial facilities with a constant inflow of large amounts of wastewater.

FOR HOUSEHOLD & SMALL OFFICE

The GDL ECO™ waste water treatment plant is intended for cleaning waste water from households. This plant enables easy and fast installation without the need for heavy machinery. The GDL ECO™ WWTP works safely, reliably, almost inaudible and without odor and is insensitive to temperature fluctuations in the environment. The high efficiency of cleaning, easy management, and adaptation of the WWTP to the needs of users are ensured by the SBR/MBBR/MBR technology.

EFFLUENT TREATMENT PLANT (ETP) In Details

Why ETP?

ETP is one type of waste water treatment method which is particularly designed to purify industrial waste water for its reuse & its aim is to release safe water to environment from the harmful effect caused by the effluent. Industrial effluents contain various materials, depending on the industry. Effluents from food & beverage factories contain degradable organic pollutants. Since industrial waste water contains a diversity of impurities & therefore specific treatment technology called ETP is required. The ETP Plant works at various levels and involves various physical, chemical, biological and membrane processes to treat waste water from different industrial sectors like chemicals, drugs, pharmaceutical, refineries, dairy, ready mix plants & textile etc.

MBR Technology Working Process With Flow Diagram

Features & benefits

- ETP is the most cost-effective & eco-friendly method.
- Helps reduce the contamination of natural water bodies and make the environment safe for others.
- Makes your industry self-sustainable.
- Preserve natural environment against pollution.
- Meet the standards for emission of pollutants set by the Government & avoid heavy penalty.
- To reduce expenditure on water acquisition.

Parameters Standards for ETP

Parameter	Units	Limits
pH	—	6-9
Color	Hazen (pcu)	150
Temperature	°C	Maximum 5 °C
Suspended Solids (SS)	mg/L	100
(BOD ₅ at 20 °C)	mg/L	30
COD	mg/L	200
Total Dissolved Solid(TDS)	mg/L	2100

*ND: not detectable

Industrial ETP Technologies

- Electrocoagulation (EC) ■
- Dissolved Air Floatation (DAF) ■
- Membrane Bioreactor (MBR) ■
- Moving Bed Biofilm Reactor (MBBR) ■
- Upflow Anaerobic SludgeBlanket (UASB) ■
- Reed Bed System (RBS) ■

Parameter	Units	Limits
Oil & Grease	mg/L	10
Chromium (Cr)	mg/L	0.5
Sulfide (S)	mg/L	2.0
Phenol Compounds	mg/L	1.0
Lead (Pb)	mg/L	0.1
Cadmium (Cd)	mg/L	0.02
Cobalt (Co)	mg/L	0.5
Nickel (Ni)	mg/L	1.0

WTP Filtration Media

Filtration media can be a fine powder, a coarse mineral, a granular substance or a substrate that resides within a filter cartridge or a media tank or in a housing which filters water as it flows through the system. When water flows through filter media at a controlled rate, the media retains the impurities that it is designed to remove. Most solid matter can be captured, while treated water is allowed to pass through.

RO Membrane Chemicals

RO Antiscalant

Membrane Cleaner

Flocculant

Membrane Biocide

Chlorine Reducer/De-chlorinator

	MODEL	APPLICATION
RO Antiscalant	Genesys BS	BWRO high Barium sulphate
	Genesys CAS	BWRO high Calcium sulphate
	Genesys LF	Broad Spectrum BW & SWRO, metal ion sequestrant, desalination sys.
	Genesys MP	Large municipal BWRO Broad spectrum
	Genesys MG	Elevated pH 2nd pass boron rejection Magnesium hydroxide specific
	Genesys PHO	High Calcium phosphate, WWRO
	Genesys RC	Small BWRO & reject recycle systems
	Genesys SI	BWRO high silica
	Genesys WB	Small mains fed systems, with dechlorinator
	Genesys LS	Brackish/Sea water low metals
Cleaner & Biocide	Genesys SW	Seawater antiscalant and dispersant, phosphorous free
	Genesol 34	Alkaline chelant, surfactant - Organics, biofouling, sulphate & silica
	Genesol 36	Anionic surfactant - Organics & biofouling
	Genesol 37	Strong Acid for inorganic scales
	Genesol 38	Mild acid dispersant - Metal & inorganic scales
	Genesol 40	Alkaline detergent, surfactant - Biofouling, organics and clay removal
	Genesol 50	Alkaline chelant - Inorganic and organic deposits
	Genesol 61	Neutral pH cleaner - Inorganic and organic deposits
	Genesol 701	Acidic powder, detergent, chelant, surfactant, effervescent - Metal & inorganic scales
	Genesol 703	Alkaline Powder, detergent, chelant, surfactant, - Clay & biofouling, organics
Chlorine Reducer	Genesol 704	Alkaline powder, detergent, chelant, surfactant, effervescent - Clay & biofouling
	Genesol 30	Suitable for use in RO and Nano-Filtration membranes & Effective against most micro-organisms
Flocculant	Genesys RED	Suitable for RO & Nano-Filtration membranes & Compatible with all types of polyamide membranes & also removes chlorine from feed water
	Genefloc ABF	Bio-fouled water source, algae/bio-stat
	Genefloc GPF	Membrane compatible flocculant
	Genefloc PWF	Drinking water approved

Our Valuable Clients

Research and Development

Green Dot Ltd. has achieved a distinguished position among the companies who are working with Environmental Engineering for its tremendous R&D works.

R&D is the first and foremost equipment for acquiring the perfect result for new innovation and application. It constitutes the first stage of development of a potential new service or product. However we the Green Dot Ltd. are always ready to take over an entire R&D project for customers with our efficient technical team that is the secret and the distinguished reason for retaining the larger shares of the market in the Environmental Engineering Sector in Bangladesh.

The research works by our specialist team members in new processes and systems as well as collaboration with the most reputed research institutions brought Green Dot Ltd. in a superior position in the field of water treatment technology.

The achievements attained through research with simulators and pilot installations are applied directly to the design of our plants, providing clear optimization of the overall performance and in operating and maintenance cost.

The lines of research in which Green Dot Ltd. is involved with:

- Design and operation simulators
- Process control
- Technology optimization
